When it comes to Carpenters Insurance for your business, you need an agent that understands your business and who insures dozens of builders just like you. Your business insurance needs are complicated and unique and a one size fits all approach could leave you with dangerous gaps in your protection.

Our special carpenter insurance program is designed to help you get the best possible protection at the lowest price. Our program can handle your carpenter liability insurance, your workers compensation insurance as well as your tools coverage and the insurance on your trucks and company owned vehicles.

We understand carpenters and we speak your language. We have tips for helping you get the most out of your insurance audit process and we understand exactly which class codes can give you the best protection while saving you the most money on your general liability policy and your workers compensation insurance policies. And although we offer you experienced agents with a niche understanding of the carpentry and building business, we don't charge one dime for our time to advise you and help you through the complicated process of making sure you have the right protection. Try asking your accountant or your attorney for an in depth review and consultation at no charge. Good luck. But the best part of all is that since we handle the insurance needs of so many building companies, we can handle yours quickly and at a lower cost to you. In most cases we will have your carpenter insurance policy quotes ready in 9 minutes or less.

Don't trust your business insurance needs to someone who does not have extensive experience writing insurance policies for carpenters and builders just like you. Call us today, toll free, at 877-687-7557 for a free risk review and policy quote.
